

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

the 1990s, the number of people with a diagnosis of schizophrenia has increased by 50% (Meltzer 1996).

There is a growing awareness of the need to address the needs of people with mental health problems, and the importance of the role of the community in this. The World Health Organization (WHO) has developed a 'recovery approach' to mental health care, which emphasizes the importance of the role of the community in the recovery process (WHO 1993). This approach is based on the idea that people with mental health problems can recover and live full, meaningful lives if they are given the opportunity to participate in the community and to take control of their own lives. The recovery approach is based on the following principles:

- People with mental health problems can recover and live full, meaningful lives.
- Recovery is a process, not a destination.
- Recovery is based on the individual's strengths and resources.
- Recovery is based on the individual's participation in the community.
- Recovery is based on the individual's taking control of their own lives.

The recovery approach is based on the idea that people with mental health problems can recover and live full, meaningful lives if they are given the opportunity to participate in the community and to take control of their own lives. The recovery approach is based on the following principles:

thereby somewhat increase the amount of earnings from this business.

Relations with connecting roads continue friendly. A contract has been executed during the year with the Central Vermont Railroad, which, it is hoped, will prove mutually advantageous, and tend to harmonize any differences heretofore existing.

The contracts between this corporation and the roads south of Concord expired during the past year, and negotiations for new ones are now pending.

The Manchester & Keene Railroad is now in continuous operation; and it is hoped that the Peterborough & Hillsborough Railroad, from having this connection, which has long been needed, will be able to increase the amount which it has heretofore earned.

The legislature at its last session passed an act to authorize the union of the Concord & Claremont (N. H.) Railroad with this corporation. It is recommended that said act be accepted, and that the stockholders authorize the directors to agree upon the terms, conditions, and guaranties of such union.

The indebtedness of the corporation remains as it was last year, consisting of coupon notes amounting to \$177,000, and the guaranty by this corporation of bonds of the Concord & Claremont (N. H.) Railroad to the amount of \$299,500 in addition to those owned by it. It also continues to purchase the semi-annual interest coupons on one hundred thousand dollars of bonds of the Peterborough & Hillsborough Railroad, amounting to \$6,500 per annum.

The Ogdensburg & Lake Champlain Railroad Company's claim upon the Northern Railroad and other roads in the line, to recover a large sum alleged to be due under the old line contract, has been denied by the roads against which it is made; and suits against this corporation and other roads in the line are now pending.

The claim of the receivers and managers of the Vermont

Number of passengers carried one mile to and from upper roads,	4,926,741
No. of tons merchandise carried the past year, .	498,223
